

Road to IDR

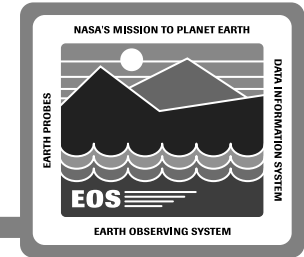

Craig Schillhahn

31 March 1995

Schedule

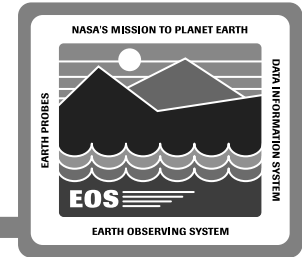

First Steps

Initial Planning

- **Review ILN**
 - **Repackage subsystem tasks to match build/thread**
 - **Show FOS and Rel A Dependencies**
 - **Add Technology Decision Points**
- **Prototype Plan**
- **Detailed Planning**

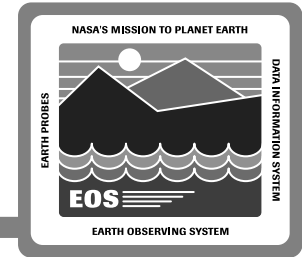

ILN

A/B Sync Points and Linkages:

- **RIR**
- **May 1 1995 - Case Tools Populated**
- **CDR-A - Review Separation Between CDR-A & IDR-B**
- **TRR-A - Review NCRs to Release A**
- **CSR-B - Review NCRs to Release A**

Intuitive Critical Path

Mission Essential Events (cont.)

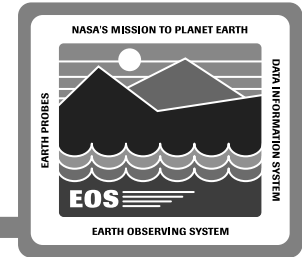

Development Tall Poles:

- MSS / Accounting & Billing (New COTS)
- DIM / LIM / DD (Data Dictionary)
- V1 Client
- Science Data Server
- A/B I&T (Installation of Rel B into Operational Rel A site)

Subject To Refinement:

- PD, DD, CUT, B/T will be re-evaluated to leverage off Release A and Accommodate FOS Schedule.

FOS Dependencies

FOS is dependent on having successfully integrated the following services during Release A

- **Network**
- **Interprocess Communication**
- **Multicast**
- **Integrated fault and event reporting**
- **Security (network authentication, authorization, data integrity)**

FOS is dependent on the following services for Release B

- **Performance reporting**
- **E-mail**
- **Help**
- **Long-term data archive services**
